

SUSTAINABLE INVESTMENT STUDY 2017

LABELS, RATINGS AND INSTITUTIONS

The new e-fundresearch.com study constitutes a comprehensive report on the labels, ratings and associations that are most prominent in the Socially Responsible Investment (SRI) marketplace.

SCOPE AND FOCUS OF THE STUDY

- What sustainability labels and ratings are available for investment products?
- Which SRI strategies are most widely supported by labels and ratings?
- What are the crucial differences in terms of requirements, product focus and accessibility of the different labels?
- How can fund providers acquire a label? How does the application process work and what are the costs?
- Which associations connected to responsible investment are active in the different geographic markets? What do they offer?

The majority of labels and institutions connected to sustainable investing are located in Europe but this study keeps a global perspective and also includes examples from other continents. The content for this report was sourced directly from communication with label providers and institutions active in the field of SRI as well as from publicly available sources.

CONTENT

- More than **70 pages** of analyses, graphs, tables, and descriptions.
- Overview of **recent and current developments** in the social responsible investment market.
- Comprehensive **analyses** of current **sustainability labels** concerning their product focus, criteria requirements and application process.
